# CONTENTS

## PRODUCT OVERVIEW

The Remora™ for 3M™ Peltor™ adds tons of functionality to the factory ARC adapter. Remora™ for 3M™ Peltor™ sandwiches between the adapter cap and rail adapter. It provides a universal mount platform that accepts M1913 Rail accessories, SureFire® Scout® footprint, and our patented FUSION™ system components. Due to the size of the OEM 3M™ Peltor™ ARC adapter hub, rail space for other mission critical accessories is limited. Remora™ for Peltor™ creates economy of space for anyone using a factory headset rail mount. Remora™ for Peltor™ will also work with third-party rail adapters.

One (1) REMORA™ MOUNT FOR 3M PELTOR™

1

Remove OEM Pivot Screw and outer sub assembly.

2

Install desired accessory on Remora with included hardware or integrated Picatinny Mount.

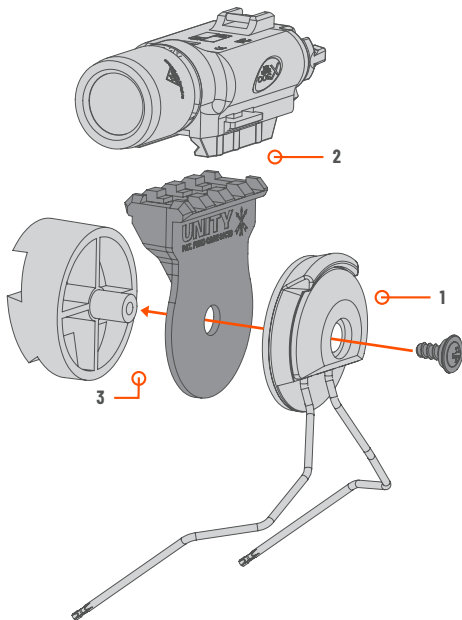

- Use 10-32 Screws to install FUSION™ Components.
- Use 8-32 Screws to install Surefire™ Scout footprint lights.

3

Install Remora™ assembly onto backer post so "UNITY" logo faces outward.

4

Use included, longer Remora™ Screw to secure reassemble. **Do not over-tighten.**
